Retroactivity Adjustment Factor		-2.11%	1.80%	6.44%	4.74%	2.00%	1.22%			

Breast and Cervical Cancer Program participants share a capitation rate with the Adult population, and comprise less than 1% of that total population. As such, a separate analysis was not performed.

<sup>&</sup>lt;sup>2</sup> The retroactivity adjustment captures the difference in total claims paid versus caseload due to retroactive eligibility. Beginning January 1, 2014, the Department has implemented a 3-month retroactivity policy at the guidance of CMS. Therefore, in order to get an accurate factor moving forward, the Department analyzed FY 2013-14 Q3 to assess current retroactivity due to the policy change.

<sup>&</sup>lt;sup>2</sup> The Department has adjusted the rates paid to the BHOs in FY 2008-09 through FY 2010-11 due to budget actions. The numbers provided, here, reflects the actual paid rates and therefore do not match the numbers in Exhibit GG, which demonstrate the trend on the actuarial point estimates.

<sup>&</sup>lt;sup>3</sup> The partial month adjustment captures the difference in the amount paid per claim versus the capitation rate due to paying an adjusted rate for clients enrolled for only part of a month. After analyzing the data and historical trends, the Department determined that the most recent year with adequate runout, which in this request is FY 2012-13, most accurately represents the relationship between the claims-based rate and the capitation rate for all eligibility categories.

<sup>&</sup>lt;sup>4</sup> The partial month adjustment factor for MAGI Adults cannot be calculated in the same manner as the other categories because it does not have adequate runout. Therefore the Department has selected the Low Income Adults retroactivity adjustment factor for the MAGI Adults factor because both eligibilities are determined strictly on level of income.
